Plant and Soil **124**: 319–322, 1990.

Contents of Volume 124 1990

Volume 124, No. 1

P. Duvert, R. Perrin and C. Plenchette, Soil receptiveness to VA mycorrhizal association: Concept and method 1

A. Michelsen and S. Rosendahl, The effect of VA mycorrhizal fungi, phosphorus and drought stress on the growth of *Acacia nilotica* and *Leucaena leucocephala* seedlings 7

K. Tan and W. G. Keltjens, Interaction between aluminium and phosphorus in sorghum plants. I. Studies with the aluminium tolerant sorghum genotype TAM428 15

K. Tan and W. G. Keltjens, Interaction between aluminium and phosphorus in sorghum plants. II. Studies with the aluminium sensitive sorghum genotype SCO283 25

H. Nerson, M. Edelstein and M. J. Pinthus, Effects of N and P nutrition on spike development in spring wheat 33

F. Tardieu and S. Pellerin, Trajectory of the nodal roots of maize in fields with low mechanical constraints 39

M. D. Rumbaugh and B. M. Pendery, Germination salt resistance of alfalfa (*Medicago sativa* L.) germplasm in relation to subspecies and centers of diversity 47

S. Brown and A. E. Lugo, Effects of forest clearing and succession on the carbon and nitrogen content of soils in Puerto Rico and US Virgin Islands 53

S. C. Hulm and K. Killham, Response over two growing seasons of a Sitka spruce stand to ^{15}N-urea fertilizer 65

M. C. M. Kasuya, R. C. M. Muchovej and J. J. Muchovej, Influence of aluminum on *in vitro* formation of *Pinus caribaea* mycorrhizae 73

D. W. Hopkins, D. M. Ibrahim, A. G. O'Donnell and R. S. Shiel, Decomposition of cellulose, soil organic matter and plant litter in a temperate grassland soil 79

G. J. Davies, A. L. Cowie and R. S. Jessop, Selection of balancing ions for nutritional studies in nutrient culture experiments 87

F. J. S. A. Costa, D. R. Bouldin and A. R. Suhet, Evaluation of N recovery from mucuna placed on the surface or incorporated in a Brazilian oxisol 91

D. J. Hatch, S. C. Jarvis and L. Philipps, Field measurement of nitrogen mineralization using soil core incubation and acetylene inhibition of nitrification 97

C. S. Anuratha and S. S. Gnanamanickam, Biological control of bacterial wilt caused by *Pseudomonas solanacearum* in India with antagonistic bacteria 109

M. J. Trinick and P. A. Hadobas, Symbiotic effectiveness of Bradyrhizobium strains isolated from Parasponia and tropical legumes on Parasponia host species 117

A. P. Mallarino and W. F. Wedin, Nitrogen fertilization effects on dinitrogen fixation as influenced by legume species and proportion in legume-grass mixtures in Uruguay 127

Short communications

A. P. Mallarino and W. F. Wedin, Seasonal distribution of topsoil ammonium and nitrate under legume-grass and grass swards 137

K. Prade and G. Trolldenier, Incidence of *Gaeumannomyces graminis var. tritici* and K deficiency increase rhizospheric denitrification 141

D. Wójcik-Wojtkowiak, B. Politycka, M. Schneider and J. Perkowski, Phenolic substances as allelopathic agents arising during the degradation of rye (*Secale cereale*) tissues 143

Volume 124 No. 2, 1990

E. Hoffland, H. S. Bloemhof, P. A. Leffelaar, G. R. Findenegg and J. A. Nelemans, Simulation of nutrient uptake by a growing root system considering increasing root density and inter-root competition 149

R. G. Zhen and R. A. Leigh, Nitrate accumulation by wheat (*Triticum aestivum*) in relation to growth and tissue nitrogen concentrations 157

A. J. Gijsman, Rhizosphere pH along different root zones of Douglas-fir (*Pseudotsuga menziesii*), as affected by source of nitrogen 161

B. Touraine, N. Grignon and C. Grignon, Interaction between nitrate assimilation in shoots and nitrate uptake by roots of soybean (*Glycine max*) plants: Role of carboxylate 169

A. Jungk, C. J. Asher, D. G. Edwards and D. Meyer, Influence of phosphate status on phosphate uptake kinetics of maize (*Zea mays*) and soybean (*Glycine max*) 175

S. A. Barber and Jen-Hshuan Chen, Using a mechanistic model to evaluate the effect of soil pH on phosphorus uptake 183

R. Baas, Effects of *Glomus fasciculatum* and isolated rhizosphere microorganisms on growth and phosphate uptake of *Plantago major* ssp. *pleiosperma* 187

F. Amijee, D. P. Stribley and P. B. Tinker, Soluble carbohydrates in roots of leek (*Allium porrum*) plants in relation to phosphorus supply and VA mycorrhizas 195

P. S. Raju, R. B. Clark, J. R. Ellis, R. R. Duncan and J. W. Maranville, Benefit and cost analysis and phosphorus efficiency of VA mycorrhizal fungi colonizations with sorghum (*Sorghum bicolor*) genotypes grown at varied phosphorus levels 199

J. Le Bot, M. J. Goss, M. J. G. P. R. Carvalho, M. L. Van Beusichem and E. A. Kirkby, The significance of the magnesium to manganese ratio in plant tissues for growth and alleviation of manganese toxicity in tomato (*Lycopersicon esculentum*) and wheat (*Triticum aestivum*) plants 205

H. Marschner, H. Oberle, I. Cakmak and V. Römheld, Growth enhancement by silicon in cucumber (*Cucumis sativus*) plants depends on imbalance in phosphorus and zinc supply 211

P. N. Sharma, C. Chatterjee, S. C. Agarwala and C. P. Sharma, Zinc deficiency and pollen fertility in maize (*Zea mays*) 221

W. J. Horst, F. Klotz and P. Szulkiewicz, Mechanical impedance increases aluminium tolerance of soybean (Glycine max) roots 227

S. Suthipradit, D. G. Edwards and C. J. Asher, Effects of aluminium on tap-root elongation of soybean (*Glycine max*), cowpea (*Vigna unguiculata*) and green gram (*Vigna radiata*) grown in the presence of organic acids 233

S. Schubert, E. Schubert and K. Mengel, Effect of low pH of the root medium on proton release, growth, and nutrient uptake of field beans (*Vicia faba*) 239

J. W. M. Pijnenborg and T.A. Lie, Nitrogen fixation of lucerne (*Medicago sativa*) in acid soil: The use of rhizotrons as a model system to simulate field conditions 245

C. Sonneveld and W. Voogt, Response of tomatoes (*Lycopersicon esculentum*) to an unequal distribution of nutrients in the root environment 251

J. P. Destain, E. François and J. Guiot, Fertilizer nitrogen budgets of ^{15}N-labelled sugarbeet (*Beta vulgaris*) tops and $Na^{15}NO_3$ dressings split-applied to winter wheat (*Triticum aestivum*) in microplots on a loam soil 257

J. A. Chweya, Effect of nitrogen on thiocyanate content of *Brassica oleracea* var. *acephala* leaves 261

M. Jeganathan, Studies on potassium-magnesium interaction in coconut (*Cocos nucifera*) 265

Ch. Rutz, U. Hugentobler, H. Chi, J. U. Baumgärtner and J. J. Oertli, Energy flow in an apple plant-aphid (*Aphis pomi* De Geer) (Homoptera: Aphididae) ecosystem, with respect to nitrogen fertilization. I. Life table analyses 273

M. Krumm, V. Moazami and P. Martin, Influence of potassium nutrition on concentrations of water soluble carbohydrates, potassium, calcium, and magnesium and the osmotic potential in sap extracted from wheat (*Triticum aestivum*) ears during preanthesis development 281

H. Beringer, K. Koch and M. G. Lindhauer, Source: sink relationships in potato (*Solanum tuberosum*) as influenced by potassium chloride or potassium sulphate nutrition 287
M. G. Lindhauer and M. A. R. De Fekete, Starch synthesis in potato (*Solanum tuberosum*) tubers: Activity of selected enzymes in dependence of potassium content in storage tissue 291
D. J. Greenwood, D. A. Stone and A. Draycott, Weather, nitrogen-supply and growth rate of field vegetables 297
P. Seward, P. B. Barraclough and P. J. Gregory, Modelling potassium uptake by wheat (*Triticum aestivum*) crops 303
H. Kolbe, Wei-Li Zhang and L. Ballüer, Simulation of fertilizer influence on yield and quality of potato (*Solanum tuberosum*) tubers by nonlinear optimization method 309
